EDUCATION

University of California, Riverside

Bachelor of Science in Computer Science | **GPA: 3.84**

Riverside, CA

Sep. 2023 – Jun. 2027

- **Relevant Coursework:** Artificial Intelligence & Machine Learning, Compiler Design, Operating Systems, Computer Systems Architecture, Data Structures and Algorithms.

EXPERIENCE

Lawrence Livermore National Laboratory

AI & Data Science Intern (DSC)

Livermore, CA

Jul. 2026 – Aug. 2026

- Built an agentic scientific workflow using Python, Model Context Protocol (MCP), FastMCP, and Codex CLI to automate segmentation, skeletonization, visualization, and reporting for a 519-million-voxel X-ray CT dataset.
- Developed a validation framework that compared CT-detected defect candidates against CAD-derived geometry containing 18,468 struts, 10,206 junctions, and 93 intentionally removed struts, while accounting for scan-boundary uncertainty.
- Developed an interactive Dash and Plotly application for filtering and visualizing 3D defect candidates, searching by element ID or voxel coordinates, and inspecting full-resolution CT evidence across XY, XZ, and YZ planes.

Geospatial Accessibility Lab (UCR)

Undergraduate Researcher

Riverside, CA

Jan. 2026 – Present

- Performing data validation for a large-scale Geospatial AI dataset, manually verifying and correcting 5,000+ LLM-generated questions and answers to improve model accuracy.
- Collaborating to refine training data for Vision-Language Models, focusing on AI interpretation of map-based navigation and spatial reasoning.
- Ensuring high-quality ground truth data for the **MapBench** project, a benchmark used to evaluate AI's ability to follow human-readable directions.

UCR Association of Computing Machinery

Project Lead Developer

Riverside, CA

Jan. 2025 – Present

- Lead teams of 10+ developers as Scrum Master, facilitating Agile ceremonies and code reviews to streamline the development lifecycle and ensure 100% on-time delivery of platform features.
- Conduct technical code reviews and provide mentorship on Next.js and Tailwind CSS best practices.
- Direct the end-to-end design and development lifecycle, collaborating with on-campus organizations to define UI/UX requirements in Figma and oversee implementation.
- Projects: [UCR Archery Club](#), [National Society of Black Engineers](#), [Pre-Therapy Student Org](#), [Thai Student Union](#), [Mock Trial](#), [AI/ML CSE Resources](#).

Citrus/Cutie Hack

Software Engineering Lead

Riverside, CA

Jan. 2026 – Jun. 2026

- Directed the technical development of the [Citrus Hack 2026](#) hackathon portal, leading a team of 10+ software engineers.
- Assigned development tasks and conducted comprehensive code reviews to ensure platform stability.

Software Engineer

Oct. 2025 – Dec. 2025

- Architected web portals and dashboards for [Cutie Hack 2025](#), focusing on seamless user registration and event management.
- Translated Figma wireframes into functional interfaces, ensuring 100% alignment with branding.

PROJECTS

Royal Heart House | [TypeScript](#), [Stripe](#), [Supabase](#), [Vercel](#), [React](#), [Next.js](#) | [Live](#) | [GitHub](#)

- Built a bilingual (English/Chinese) full-stack e-commerce website.
- Implemented a product catalog, shopping cart, and Stripe payment integration for a local store's online ordering system.

CookCraft | [TypeScript](#), [Next.js](#), [Supabase](#), [Gemini API](#), [Jest](#) | [Live](#) | [GitHub](#)

- Architected a full-stack AI recipe generator by integrating the Gemini API for structured JSON generation, leveraging a Supabase (SQL) backend for secure data persistence.
- Designed high-fidelity Figma layouts and ensured code reliability through Jest testing and ESLint.

TECHNICAL SKILLS

Languages: C++, TypeScript, HTML/CSS, Python, LaTeX

Frameworks/Libraries: React, Next.js, Dash, Plotly, Tailwind CSS, Jest, GTest

Tools: Git, GitHub, Supabase, REST APIs, Codex CLI, MCP, FastMCP, Figma, Vercel, VS Code

Methodologies: Agile/Scrum, Kanban, Unit Testing
